Kent, D. E. Colony of Virginia and Sora Rails (at Bridport, Vt.). (Bull. No. 3, Vermont Botanical and Bird Clubs, April, 1917.)

Howe, Inez Addie. Nesting of the Connecticut Warbler [at St. Johnsbury, Vt.] (*Ibid.*).— This record, far away from the known breeding range of the species, is so remarkable, and the presence of Mourning Warblers so suggestive, that we cannot but wonder if the observer is familiar with the plumages of the two sexes of the latter.

Morgan, E. D. Goshawks Unusually Numerous. (*Ibid.*) [At Woodstock, Vt.]

M(urphy), R. C. The Sooty Albatross Group [in the Brooklyn Museum]. (The Brooklyn Museum Quarterly, IV, No. 2, April, 1917.)

Rintoul, L. J. and Baxter, E. V. Report on Scottish Ornithology in 1916 including Migration. (*Ibid.*, double number, 67 and 68, July–August, 1917.)— A valuable addition to this historic series which the Misses Rintoul and Baxter are so admirably continuing.

Beaupre, E. The American Golden Plover in Eastern Ontario. (Ottawa Naturalist, XXXI, No. 2, May, 1917.)

Smith, Bertram G. Peculiar Nesting Behavior of a Robin. (Seventeenth Rept. Mich. Acad. of Sci.)— The birds built five nests on successive steps of a fire escape. Two were completed and two eggs laid in one and one in the other. The bird incubated them alternately but soon deserted them both. The author considers that the similarity of the steps rendered the bird unable to recognize its nest site.

Oberholser, H. C. *Piranga rubra rubra* in Colorado. (Proc. Biol. Soc. Wash., XXX, July 27, 1917, p. 122.) The record of *P. r. cooperi* proves to be based on a specimen of *rubra*.

Oberholser, H. C. Mutanda Ornithologica. II. (*Ibid.*, pp. 125–126.)— Five names, mainly of parrots, are changed on account of being preoccupied. *Nasiterna chloroxantha* (p. 126) is proposed in place of *N. pygmaea*.

Hollister, N. The Black Vulture in the District of Columbia and

Maryland. (*Ibid.*, p. 123.)—The two records are of especial interest in connection with that of Dr. Phillips (General Notes, *antea*).

Hartert, Ernst. Notes on Gamebirds. (*Ibid.*, pp. 275–292.)—*Caccabis* gives way to *Alectoris* on grounds of priority.

C. petrosus becomes *A. barbara*, Gmelin's *Tetrao petrosus* being *Ptilomachus fuscus* which therefore must be called *P. petrosus*.

The Greek Partridge should be *A. græca* Meisner, while two new races are described: *A. g. cypriotis* (p. 278) and *A. g. falki* (p. 280), from Cyprus and Russian Turkestan respectively.

A. heyi intermedia (p. 282), South Arabia; *Perdix p. italica* (p. 283), Chianti, Italy; and *P. p. armoricana* (p. 284), Rialle, France, are described as new.

Tetrao orientalis Linn. is fixed on the Sand Grouse which thus becomes *Pterocles orientalis* in place of *arenaria*.

Francolinus pondecricianus interpositus (p. 288), Oudh, India; and *F. bicalcaratus ayesha* (p. 291), Rabat, Morocco, are described as new.

(Bolet. dela Direc. de Estudios Biologicos, Mex., I, No. 5, pp. 471-559.) — A list of the technical and of the vernacular names each arranged alphabetically, the former following the nomenclature of the 'Biologia Centrali Americana'; and a systematic list of the technical names with their derivation. [In Spanish.]

Oberholser, H. C. Notes on the Fringilline Genus *Passerherbulus* and its Nearest Allies. (The Ohio Journal of Science, XVII, No. 8, pp. 332-336, 1917.) — This genus is claimed to be composite according to the standard adopted in separating it from *Ammodramus* and *Centronyx*, and either the three should be merged, when the name *Ammodramus* will prevail for the group, or *Passerherbulus* must be divided in three. In the latter case, *Ammospiza* is available for the Sharp-tailed Sparrow and a new name, *Thryospiza* is proposed (p. 332) for the Seaside Sparrow.

The worst feature of the whole situation is that the horrible name "*Passer herbulus*" proves to be a nomen nudum as originally proposed by Maynard and would have sunk into oblivion had not an innocent cataloguer of supposedly necessary changes in the A. O. U. Check-List, who abhorred the name, inadvertently added the two words necessary to give it status, and so not only perpetuated it but gained the opprobrium of being its author!

Thornton, R. W., J. E. Duerden and F. C. Smith. Report on the North African Ostriches (Report 2, Dept. Agric. of S. Afr., 1916) imported into South Africa in 1912.

The northern plumes are much superior to those of the southern species. The two birds were successfully crossed and there is every prospect of producing a much higher grade of plumes. It is difficult to keep the pure northern bird alive in South Africa.
